PROFESSIONAL SUMMARY

Product Designer with a Computer Science background and 1 year of end-to-end UI/UX experience across research, interaction design, design systems and developer handoff. Took an AI-powered tool from idea to a working full-stack product on my own, with a 170+ video knowledge base and an automated LLM classification system. Comfortable owning ambiguous problems end to end, with enough technical depth to know what's actually feasible to build.

EXPERIENCE

Junior UI/UX Designer | Hanyaa Auto Technologies, Hyderabad **Jul 2025 – Dec 2025**

- Sole designer at the company, owning product initiatives from an ambiguous brief through research, user flows, UI and developer handoff.
- Led Tara, an AI life-admin app, from a one-line brief: interviewed 10 colleagues, surveyed 25+ working professionals and tested 15+ competitor apps to define the problem and scope.
- Presented the research and concept to the CEO and manager; it was approved for build, and I delivered wireframes, full UI and handover docs for a 1–2 person Android team.
- Worked directly with the CEO and AI/ML team to turn complex requirements into clear product experiences, iterating quickly in Figma with stakeholder feedback.

UI/UX Design Intern | Hanyaa Auto Technologies, Hyderabad **Jan 2025 – Jun 2025**

- Contributed to early-stage product design across research, ideation, user flows, UI and prototyping.
- Led primary research for an EV concept (interviews, surveys, visual preference testing) and presented the direction to the CEO and AI/ML team.
- Collaborated with design and development teams through feedback cycles, documentation and final handoff.

PROJECTS

Reyo: AI save and retrieval tool for designers | Self-initiated 0→1 product

- Led research with 25 designers and 5 interviews, uncovering that 84% couldn't find a saved reference when they needed it, and shaped the product around that moment.
- Mapped 9 competing tools and turned the gap into 7 design decisions, each with a reason and a "chose not to do".
- Designed the end-to-end UX: save flow, context-aware search results and permission-first privacy, across a Chrome extension, a Figma overlay and a desktop library.
- Created the brand and design system with light and dark modes, then prototyped it into a working MVP to validate the flows.

Tara: AI life-admin assistant | Company project, Hanyaa · Sole designer

- Turned a one-line brief into a clear product direction, defining personas, key questions and the design decisions behind each feature.
- Designed the full Android experience, from onboarding, scan and review to the Horizon timeline and reminder details, focused on trust and calm, low-noise notifications.
- Built the visual identity and design system from scratch and delivered handoff-ready UI for the dev team.

EV Concept for Indian Commuters | Company project, Hanyaa · Design researcher

- Planned and ran primary research (interviews, surveys and visual preference testing) to understand how Gen-Z and young urban commuters choose, ride and feel about two-wheelers.
- Synthesised the findings into user needs and product opportunities, framing the direction around a lightweight, practical and personalised EV experience.
- Presented the insights and recommended direction to the CEO and AI/ML team, which shaped the next stage of product exploration.

SKILLS

Design: Product Design, UX/UI Design, Interaction Design, User Flows, Information Architecture, Wireframing, Prototyping, Design Systems, Visual Design, Mobile & Web
Research: User Interviews, Surveys, Usability Testing, Competitive Analysis, Synthesis (Affinity Mapping, JTBD, HMW)
Tools: Figma (Variables, Auto Layout, Prototyping), FigJam, Adobe Illustrator, Photoshop, Premiere Pro
Technical: Vibe coding and AI-assisted prototyping (Claude, Emergent, Figma Make, Base44), LLM workflows (prompt design, classification pipelines, embeddings and semantic search), React, Next.js, Vite, React Native (Expo), HTML/CSS/JavaScript, Chrome extensions, Supabase, Postgres, Vercel deployment

EDUCATION

B.Tech in Computer Science and Engineering — Centurion University of Technology and Management, Paralakhemundi | **2021-2025** **CGPA 8.5**

Intermediate — Narayana Junior College, Vishakapatnam | **2019-2021** **Percentage: 90%**

Class 10 — Public School, Jeypore | **2018-2019** **Percentage: 86%**

CERTIFICATION

10k Designers — Product & Industrial Design
Learned the industry product design process: problem framing, user research and designing for business goals.
